

Split Pin Windmill Craft Instructions

Follow these simple steps to make your own split pin windmill that spins in the wind!

You will need:

- Split Pin Windmill template
- scissors
- one split pin

What to do:

- Carefully, cut out both pieces of the windmill template.
- Colour in the template pieces on both sides.
- Using the split pin, pierce a small hole through the circles on the templates - one in the centre of the windmill spinner and one at the top of the windmill stand.
- Push the split pin through both holes together and open it up at the back to secure it.
- Take your windmill spinner out into the wind and watch it whirl!
